

# Agile Books by Women

It recently struck me that I wasn't that aware of agile books by women in the agile community. Sure, I was aware of a few, but I became curious about the number of female authors and the topics they explored.

As I began to search, I realized there were very few resources on the topic. This was one of the only collections I found and it provides some European voices that I hadn't been exposed to – <https://www.smidig.de/agile-books-by-female-authors/> which was written by Julia Dellnitz. Thank you for the inspiration to write this, Julie!

I also found this link on Women in "Product" to follow – <https://www.productplan.com/learn/women-in-product-to-follow/>, that includes two of the authors on my list.

And finally, I found this on the Business Agility Institute site – Women in Agile and the Confidence Code – <https://businessagility.institute/learn/women-in-agile-and-the-confidence-code/330>

What I found in my search was a wonderful list of incredibly talented women who've written on a wide variety of topics. Now, I know that I've missed many wonderful authors. So, please feel free to send me a message or comment so that I can be more inclusive on my list.

But that being said, I do think it's a deep and rich list that's worthy of your consideration. And I want you to join me in—

## **CELEBRATING and APPRECIATING**

these wonderful women and their contributions to our agile community.

Stay agile my friends,  
Bob.

\*\*\* = I've either read this books myself or they are in my Q to be read.

\* = co-authorship

**Last updated: October 2022, version 2, added ~45 more authors to the original list.**

# Agile Books by Women

## The List

---

**Marsha Acker** – The Art & Science of Facilitation, \*\*\*

<https://www.amazon.com/Art-Science-Facilitation-Effective-Collaboration-ebook/dp/B08PN85Q7F/>
